Summary

Frontend-leaning developer with experience in React, currently learning backend technologies.

Education

B.Sc. Computer Science, St. Xavier's College, 2026

Skills

React, JavaScript, HTML, CSS, Tailwind CSS, Figma, Git, basic Node.js, basic MongoDB

Projects

Recipe Finder App - A React application that fetches recipes from a public API and displays them with search and filter functionality, styled with Tailwind CSS.

Personal Blog - Built a static blog frontend using React and deployed on GitHub Pages. Used Figma to design the UI before implementation.

Internship

UI Development Intern, BrightWeb Studio (Summer 2025)

Implemented responsive UI components in React based on Figma designs. Fixed CSS layout bugs across browsers and collaborated with a small design team.
